Blended Case Management

Blended Case Management

Helping You Get Back on Your Feet

If you or someone you love suffers from mental illness, you know that a little extra help and support can go a long way. It can be as simple as getting to your doctor's appointment on time. Or maybe you're ready to look for a job but don't know where to start. Nulton Diagnostic and Treatment Center can help.

Through our innovative Blended Case Management program, our team of specially trained case managers is there to support you every step of the way. In fact, we are focused on achieving just one goal—to help you get the care, treatment and support you need to make your recovery as successful as it can be.

Services That Meet Your Needs

Building a Strong Support Network

Our Blended Case Managers are trained to help you build a strong support network so that you can stay at home and avoid out of home placement.

Through our partnerships with mental health providers, social service organizations, job training experts and community organizations, we help you strengthen your life skills, and get the care and support you need throughout your recovery.

Our case managers know how to coordinate services, and can assist you with a range of support services, including:

- Transportation
- Housing
- Education
- Job training or employment opportunities

We can also help you navigate today's health care system. As your advocate, we can help you determine if you are receiving the right care. We can help you stay on track with your medications. We can even help you get proper health insurance.

24/7 Support

And if you need us, we're here around-the-clock to help you manage any crisis situation that may come up. Seven days a week, 24 hours a day.

Best of all, we won't be strangers. You'll come to know your Case Manager—and he or she will know you. We can provide face-to-face consultations in our office, at community locations, or in your home. And through regular phone calls or email correspondence, we will make sure you have the support you need to achieve your goals.

Getting Started

You can refer yourself to our program. Your doctor, a family member, a social service agency or a friend can also contact us to get you started.

Our Blended Case Management Services are available to those receiving Medical Assistance (Access Card) who meet certain eligibility guidelines based on their diagnosis, treatment history and level of functioning. Our team will evaluate you with this in mind before services can begin.

Services can be provided to adults, adolescents or children. For more information or to make a referral, contact us today at 814.361.2077.
